Annex G (2022)**

1. For the purpose of interpreting the Product Specific Rules set forth in this Annex:
 - a) **Chapter** means a chapter of the Harmonized System;
 - b) **Heading** means the first four digits in the tariff classification number under the Harmonised System;
 - c) **Section** means a section of the Harmonized System;
 - d) **Subheading** means the first six digits in the tariff classification number under the Harmonized System;
2. This Annex is set out as follows:
 - a) **Columns 1&2** – Tariff Reference
 - b) **Column 3** – Product Description
 - c) **Column 4** – Applicable Product-Specific Rule of Origin
3. The specific rule, or specific set of rules, that applies to a particular heading (4-digit code) or a subheading (6-digit code) is set out immediately adjacent to the heading or subheading.
4. Unless otherwise specified in the Annex, a rule applicable to the subheading shall take precedence over a rule applicable to the heading which is parent to the subheading.
5. Where a tariff heading or sub-heading is subject to alternative Product Specific Rules, the rule will be considered to be met if a good satisfies one of the alternative rules.
6. Where the Product Specific Rule requires only a regional value content, the final process of production must be performed within a Party.
7. A requirement of a change in tariff classification applies only to non-originating materials.
8. Where the change in tariff classification rule expressly excludes a change from other tariff classifications, the exclusion applies only to non-originating materials.
9. Reference to weight in the rules for goods provided for in Chapter 1 through 24 of the Harmonized System means dry weight unless otherwise specified in the Harmonized System.
10. Chapter notes within this Annex apply to all headings or subheadings within the indicated chapter unless a specific exclusion is indicated.

11. Reclassification of a good without undergoing processing is not in itself sufficient to convey origin.

<p>Chapter Note: For purposes of this chapter, a "chemical reaction" is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule The following are not considered to be chemical reactions for the purposes of this definition:</p> <p>(a) dissolving in water or other solvents;</p> <p>(b) the elimination of solvents including solvent water; or</p> <p>(c) the addition or elimination of water of crystallization</p> <p>For the purposes of heading 2710, the following processes confer origin:</p> <p>(a) Atmospheric distillation - A separation process in which petroleum oils are converted, in a distillation tower, into fractions according to boiling point and the vapour then condensed into different liquefied fractions Liquefied petroleum gas, naphtha, gasoline, kerosene, diesel/heating oil, light gas oils, and lubricating oil are produced from petroleum distillation</p> <p>(b) Vacuum distillation - Distillation at a pressure below atmospheric but not so low that it would be classed as molecular distillation Vacuum distillation is useful for distilling high-boiling and heat-sensitive materials such as heavy distillates in petroleum oils to produce light to heavy vacuum gas oils and residuum In some refineries, gas oils may be further processed into lubricating oils</p>
