

About this form

Before arrival

This form, including supporting documentation, must be provided not less than 48 hours before the estimated time of arrival of the craft in New Zealand.

For New Zealand Customs Service purposes 'arrival in New Zealand' refers to 'New Zealand' as defined in the Customs and Excise Act 2018. For the majority of vessels this will mean arrival in New Zealand's territorial waters, which extend 12 nautical miles from the coast.

On arrival

On arrival in New Zealand, the craft must proceed to a designated New Zealand Customs Service and Ministry for Primary Industries port, unless authorised by the Chief Executives of the New Zealand Customs Service and the Ministry for Primary Industries or compelled by navigation-related requirements or accident or stress of weather or other necessity, to arrive elsewhere.

A confirmation of health status 12 to 24 hours prior to arrival at a pilotage area must be provided to Health Protection Officers at the port of arrival. If the status of the information contained in this form (including supporting information) changes at any time, officials must be notified immediately.

For your information

Penalties for knowingly giving false or misleading information, or failing to provide information required by law, include fines or imprisonment for up to one year.

Officers engaged in the clearance of arriving vessels will discontinue the process if they encounter crew behaviour that they deem inappropriate or a compromise to safety. Delays in the completion of clearance formalities will inevitably result.

Completing this form

You can complete this form by saving a copy to your personal device. Information you have filled in can be saved as you go so you don't have to complete it in one session.

You can choose to print and complete this form by hand instead. Use a blue or black ink pen and write clearly.
